BASIC-ABSTRACT: NOVELTY - The method for evaluating products on the electronic commerce is provided to collect evaluating information for a product purchased by a customer.

DETAILED DESCRIPTION - A customer buys a product from an electronic store(st1). The electronic store transmits purchaser information such as an electronic mail, adress a personal article of the customer, and delivery information to a storing medium(st2). The storing medium transmits an electronic mail to a mail server for requesting the evaluation to the customer after a predetermined time(st3,st4). If the customer transmits a reply for evaluating the product(st5), the storing medium transmits the evaluated result to the electronic store(st6). The electronic store received the evaluated result may offer a profit or a benefit to the customer(st7).
